

INSTALLATION AND MAINTENANCE INSTRUCTION FOR MARBLE & BRASS PATTERNS

Brass and marble may be susceptible to scratching in handling and installation, as well as use.

Expect variation of colour from production run to production run.

Installation

Only use mortars with high adhesion and elasticity and which are especially engineered and recommended for installing marble items. Select a trowel of appropriate size to ensure full coverage of the mortar. All substrates should be properly reinforced to be sure there is no movement.

Adhesives & Grouting

Any type of cement based adhesive & grout is suitable in dry areas.

Maintenance

Use a non-abrasive cloth and neutral detergents for cleaning. Avoid acid detergents, chemicals and solvents as they may damage the brass and stain the marble.

Usage

It is recommended for interior walls. **Do not use in areas submerged by water as well as not recommend in shower floor and wall.**
